Vacuum Set IP7

The vacuum set IP/ is a handy and ruggedly designed tool for maintain your Natural Pool. The IP7 runs with an electric (230 V) and provide a flow rate of 7 m³ per hour.

The direction of flow is easily changeable with a switch. Air in the pipes does not interrupt the vacuuming, because the sucked impureness is not filtered, but pumped through the system. Only few minutes are needed to set up the vacuumer.

The vacuumer set IP7 includes the pump, a suction hose with a transparent part and a pressure hose. The total length of both hoses is 25,50 m, diameter 38 mm. Also a triangle floor brush, a brush for the gravel pond zones and a threepart telescope bar 1,80 – 4,80 m.
